

Md. Subahan Ali

Front-end Developer

Thakurgaon, Sador +8801310134801 | subahanislam523@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

CAREER OBJECTIVE :

Passionate front-end developer with over 1 year + of experience crafting dynamic, user-centric web applications. Proficient in JavaScript, HTML, CSS, and React frameworks, with a keen eye for design and responsiveness. We are dedicated to building efficient and innovative solutions to enhance user experience.

SKILLS :

Expertise: HTML5, CSS3, Bootstrap5, Tailwind CSS, JavaScript, React.JS, React Router DOM, MySQL, GitHub.

Comfortable: MongoDB, Mongoose.

Familiar: Node.JS, Next.JS, Tanstack query, JWT, AXIOS, Express.JS, MySQL.

Tools: VS Code, Vercel, Chrome Dev Tool, Figma, Pixso, Netlify.

Projects :

Hotels Booking Management | [Client Side](#) | [Server Side](#) | [Live Side](#)

Grandview Hotels is a hotel booking website that allows users to book rooms for specific dates and manage their bookings. Users can search for rooms by price range to find budget options.

Key Features:

- The application supports user registration and login functionality
- Users can search by title, filter by publisher or tags, and sort articles by date
- Optimised for all devices, ensuring seamless user experience on smartphones, tablets, and desktops.

Technologies: Node JS, React, JavaScript, MongoDB, Tailwind CSS, Bootstrap5, Vercel, Firebase.

Shopping Center | [Client Side](#) | [Server Side](#) | [Live Side](#)

Shopping Center is a full-stack web application that facilitates user product ordering while providing an easy management interface for shopping admins.

Key Features:

- The application supports user registration and login functionality
- Authentication is managed with JWT tokens for security and persistent login sessions
- Stripe payment gateway integration to handle transactions.

Technologies: Node JS, React, JavaScript, MongoDB, Tailwind CSS, Bootstrap5, Firebase, Vercel.

Asset Management | [Client Side](#) | [Server Side](#) | [Live Side](#)

Imagine a company called XYZ is creating a web application to help businesses manage their assets and products.

Key Features:

- Secure and efficient payment processing for premium subscriptions.
- Users can search by title, filter by publisher or tags, and sort articles by date.
- Users can also pay package order bills through a payment gateway stripe.

Technologies: Node JS, React, JavaScript, MongoDB, Tailwind CSS, Bootstrap5, Firebase, Vercel.

Education: Computer Science Technology - Dinajpur Polytechnic Institute - 2021 Present
